

# Wilmer A. Gonzalez S.

Machine learning engineer

Caracas, Venezuela.

Latest  / Dark 

 wilmeragsgm

 wilmeragslin

 wilmeragsgh

## EXPERIENCE

---

### • Serhant (through blocknerds.io)

(remote) Caracas, VE

Senior Machine learning engineer Lead

May 2024 - Present

- Design and implement +5 Real state LLM use cases, reducing advisors' waiting time by at least 20%
- Increase team productivity by establishing MLOps practices like Prompt versioning
- Develop Agents with tooling access to satisfy Real estate use cases, using MCP.
- Integrate services and REST APIs in workflows with n8n.

Company summary: Real estate company building tools for advisors and agents through automations and AI.

**Tech:** Python, JS, Azure, PromptLayer, LLMs, OpenAI ChatGPT, Claude, Langchain, HuggingFace, MCP, n8n, CI/CD.

### • The Hackett Group (through Develative)

(remote) Caracas, VE

AI Solutions Architect

Nov 2024 - Feb 2025

- Design architecture for LLM solutions related to BPMN
- Extend platform to include new LLM components

Company summary: ERP Company assisting ideation of customer industries' use cases through Gen AI.

**Tech:** Python, Django, Azure, LLMs, OpenAI, Langchain, Huggingface.

### • Brightflow.AI

(remote) Caracas, VE

Machine learning engineer

May 2023 - May 2024

- Increase customer success team productivity by 10% by enabling model performance visibility on forecasting.
- Increase team productivity by 20% by establishing MLOps practices like model versioning and registry workflows.
- Develop a full-stack LLM component using financial data to generate insights for 100+ brands, increasing user engagement by 15%.

Company summary: CPG-focused company generating financial insights to brands using analytics and AI.

**Tech:** Python, Typescript, React, AWS, LLMs, OpenAI ChatGPT, MLflow, AWS Athena.

### • CircleUp (Acquired by Brightflow.AI)

(remote) Caracas, VE

Machine learning engineer

August 2021 - May 2023

- Establish MLOps practices across 100% of ML use-cases of the company, reducing development time by 12%.
- Enable semantic comparison of 1.7M brands and a hundred thousand text attributes.
- Improve and maintain ML pipelines of millions of observations with tens of GB-scale text data.

Company summary: CPG-focused company identifying investment opportunities using AI

**Tech:** Python, PySpark, Airflow, AWS, GCP, Vertex, BigQuery, Dataproc, Tensorflow, Keras, Huggingface, BERT.

- **Sigma**

(remote) Caracas, VE

*Senior Machine learning engineer*

*June - September, 2023*

- Develop a misleading claims detection system for an advertising platform by using LLMs and prompt engineering.
- Integrate third-party ML services for feature detection and moderation on advertising creatives (image and text-based).

Company summary: Consulting company providing development to advertising companies for moderation.

**Tech:** Python, GCP, Vertex AI, NLP, LLMs.

- **UNDP (UN)**

Caracas, VE

*Machine learning engineer*

*August 2019 - October 2025 (seasonal)*

- Provide summaries from opinions and trends by processing 1.1M tweets with Topic Modeling and transformer-based models, reducing analysis time by 25%.
- Reduce network analysis time by 83% by automating community and hub detection on hundreds of thousands of social media users' data.
- Sped up the analytical workflow by 75% by redesigning the sampling strategy of pipelines.

Organization summary: UN's division focused on exploring and analyzing nations' development-related topics through social media

**Tech:** Python, R, Bash, Azure, AWS, Gephi, Power BI, REST API, Vue, Airflow, Kubernetes, Tensorflow, BERT, NLP, Data engineering, Data visualization, Metabase, Workflow orchestration, Social networks analytics.

- **Quash**

(remote) Caracas, VE

*Machine learning engineer (advisor)*

*March - July, 2021*

- Technical guide of the Data Science team.
- Decrease feature engineering time by 10% by creating 10+ data pipelines.
- Deploy personalized ML models for credit scoring, processing 10k+ applications across 5+ countries.

*Machine learning engineer*

*February 2019 - March 2020*

- Developed a customer-facing API for using our internal credit scoring model.
- Increased approval rate by 15% of customers while keeping the same risk by optimizing state-of-the-art ML models.

Company summary: Fintech company focused on improving underwriting models in underserved populations using AI.

**Tech:** Python, R, JS, Vue, AWS, Sagemaker, OpenAI, Vercel AI, S3, REST APIs, Docker.

- **Universidad Central de Venezuela**

Caracas, VE

*Adjunct professor (Advanced topics in AI and data mining)*

*October 2018 - July 2024 (seasonal)*

- Designed and organized course material and resources for topics described in *here*.
- Lecture material for tens of students and graded their assignments.
- Tutored thesis work on AI related to computer vision  
(*Awarded with country-wise recognition for thesis work between 6 final candidates*).

*Teaching assistant (Introduction to Data Science, Data Mining)*

*April 2015 - February 2018*

- Designed and organized practical course material and resources for topics described in *here*.
- Lectured practical material for students and grade their assignments.

Academic summary: Assist in AI-related topics throughout a Computer science BSc' program.

**Tech:** Python, Latex, R, Weka, Colab, Jupyter and swirl.

- **Omdena**

(remote) Caracas, VE

*Lead machine learning engineer*

*Jan - Apr, 2021*

- Helped create a trust score for news articles by implementing a claim detection model.
- Improved usability of the product by creating a chrome extension connected to resultant models (blog post).
- Contributed to open-source projects (claimbuster-spotter) related to NLP and Deep Learning models.

Project summary: Create an MVP for a disinformation platform focused on news articles through NLP.

**Tech:** Python, JS, Keras, Tensorflow, Falcon, REST APIs, Chrome extension.

- **Oliver Wyman**

(remote) Caracas, VE

*Data engineer*

*July - November, 2020*

- Enabled data pipelines processing by provisioning and configuring Airflow.
- Created DAGs for 30+ stored procedures from SQL Server scripts.
- Created DAGs for importing tabular data (1M+ records) to SQL Server.

Project summary: Assist the migration of procedures and pipelines across databases.

**Tech:** Python, Airflow, SQL Server, Jenkins, Rancher, Docker, Kubernetes.

- **Advoqt**

(remote) Caracas, VE

*Machine learning engineer*

*February - August, 2019*

- Enable malicious URL classification by developing a deep Learning model with  $\approx 90\%$  accuracy.

Company summary: Cyber-security firm building tools with AI.

**Tech:** Python, Tensorflow, Elasticsearch and Spark.

- **Fetcher**

Caracas, VE

*Data scientist*

*June 2018 - February 2019*

- Decreased overload of sourcing teams by 10% by creating an automated allocation algorithm using Linear programming and Constraint Satisfaction techniques.
- Deployed load estimation models for tens of candidate sourcing projects for all recruiting teams.

Company summary: Recruiting firm building tools for candidate selection and hiring analytics.

**Tech:** R, Shiny, Latex, SQL and Metabase.

- **Predictvia**

Caracas, VE

*Machine learning engineer*

*February 2016 - January 2017*

- Performed social network analysis on millions of social media users and posts to detect hubs, and performed supervised and unsupervised learning.
- Built and implemented classification models, perform feature engineering, and calibrated existing models.

Company summary: Social media advertising company helping businesses target customers with AI

**Tech:** Python, R, Bash, Scikit learn.

## TECHNICAL SKILLS

---

- **Programming languages:** Python, R, Bash, Julia, TS/JS.
- **Cloud services:** AWS (Lambda, S3, Sagemaker), GCP ( Vertex AI, BigQuery), Azure (Functions, Blob storage, AKS).
- **Deep learning frameworks:** Keras, Tensorflow, Pytorch, HuggingFace, sbert.
- **Others:** xgboost, scikit, pandas, falcon, flask, fastapi, Docker, Kubernetes, Jenkins, Terraform
- **Currently learning:** Nuxt, Nodejs.

## EDUCATION

---

- **Universidad Central de Venezuela** Caracas, Venezuela  
*B.Sc in Computer Science* Sept. 2012 – Jun. 2018
  - Took elective courses on: Introduction to data science, Advanced topics in data science, Artificial Intelligence, Data mining, Text mining, NoSQL databases, Digital image processing.
  - (Thesis title) AdaBnn: Binarized Neural Networks trained with adaptive structural learning.

## PERSONAL PROJECTS ([WITH LINKS](#))

---

- Philia: A Slack bot for empathy assessment in co-workers communications.
- AdaBnn: Binarized Neural Networks trained with adaptive structural learning.
- WarmChat: Chat room web app that classifies insults messages by using several classifiers.
- Small tool for generating frequent words analysis on the position names of LinkedIn Connections.
- Template for dockerized shiny (R) application deployment.
- Latex template for CVs with dark theme, with CV guidelines from google.
