## SUMMARY

A **product-focused Full-Stack Engineer** with 8+ years of experience building and launching **scalable web applications** from concept to production, with a strong commitment to **end-to-end ownership**. Proven ability to transform user needs into impactful, **revenue-driving features**, specializing in **strong frontend development (React, Next.js, TailwindCSS)** and iterating quickly with **business stakeholders**. With direct **experience working in a startup environment**, I am eager to leverage a **product mindset** to drive **CRM-integrated features and customer data workflows** within a fast-scaling greentech startup like Enpal, contributing directly to the mission of making clean energy accessible.

## EXPERIENCE

### • JL Studio

Full-stack Engineer

Remote

January 2021 - Present

#### Key Projects:

- **Temple Lighting Platform (E-commerce):** Worked closely with **business stakeholders** to identify operational pain points, engineering a full-stack e-commerce platform that drove **40% business growth** by optimizing customized **customer data workflows**.
- **Apparel X (Enterprise SaaS ERP Platform):** Collaborated directly with corporate clients to map complex workflows, developing and maintaining a long-term (5+ years) **multi-tenant SaaS ERP platform** on GCP with robust inventory and order management.
- **Forexify AI Lab (AI-Powered Trading Platform):** Architected and implemented a full-stack AI-powered trading platform, demonstrating **end-to-end product ownership** in delivering complex, real-time dashboards and significantly enhancing efficiency through AI-driven insights
- **Zuoluh (AI-Driven Fintech Startup):** Led technical architecture and prototype development for an AI-driven financial app, designing a custom RAG system for reliable ESG data analysis and demonstrating **full-stack and AI integration capability** in complex data workflows.
- **We Are Enough (Interactive Website for Nonprofit):** Transformed intricate Figma designs into production-ready, interactive web platforms using Vue.js and GSAP, demonstrating strong **UX/design skills** and ability to deliver engaging, pixel-perfect frontend experiences with a **lean mindset**

Company summary: As a self-employed developer and co-founder of JL Studio, led technical architecture and implementation of AI-integrated applications, emphasizing end-to-end product ownership in collaboration with designers to discover client pain points and solve the right problems for international clients.

**Tech:** React, Next.js, TailwindCSS, Vue.js, TypeScript, State Management, Python (Flask), GCP, RAG Architecture, CRM Features, Customer Data Workflows, GSAP.

### • Stone River Information Technology

Software Engineer

Taipei, Taiwan

December 2017 - December 2020

- Developed **enterprise business intelligence** solutions and **custom management systems**, implementing robust data security measures for corporate clients

Company summary: An IT consultancy developing enterprise business intelligence and custom management systems for corporate clients like Asia Cement Corporation.

**Tech:** Enterprise Solutions, Business Intelligence (Power BI), Data Processing (SSDT), Data Security.

• **Sense Innovation**

Software Engineer

Taipei, Taiwan  
May 2016 - July 2017

- Worked closely with end-users to understand core needs, and crafted user-centric **eye-tracking assistive technology** that **enabled over 100 individuals with disabilities** and demonstrated a commitment to impactful product development.

Company summary: A technology startup focused on developing eye-tracking assistive software to improve digital accessibility for individuals with disabilities.

**Tech:** Assistive Technology, User-Centric Design, Computer Vision, UX Principles.

PERSONAL PROJECTS (WITH LINKS)

- **CycleGrowth (AI-Powered SaaS Platform):** Built an **AI-powered SaaS platform** using **React, Next.js, and TypeScript**, focusing on intelligent UX flows, AI integration, and comprehensive testing for application stability and **rapid iteration**.
- **Persona Muse (AI Persona Generator for Hackathon):** Developed an **AI Persona Generator** during a hackathon, **integrating LLMs** to create detailed user personas and showcasing strong **UI/UX design** and rapid development.

SKILLS

- **Languages & Frameworks:** Python (Flask), Node.js, TypeScript, JavaScript, React, Next.js, Vue.js, PHP
- **AI & Data:** LLM Integration, RAG Architecture, Prompt Engineering, AI Workflow Optimization, PostgreSQL, MySQL, ChromaDB
- **Infrastructure & Cloud:** GCP, Docker, Supabase, Vercel, Scalable Architecture, IaC Concepts
- **Engineering & Product Practices:** End-to-end Product Ownership, Agile Development, Lean Mindset, Rapid Prototyping, CI/CD, Automated Testing, Performance Optimization

EDUCATION

- **National Chengchi University**  
Bachelor of Science, Management Information Systems  
Taipei, Taiwan  
Sept. 2013 – Jun. 2017

LANGUAGES

- **English** — Fluent  
**Chinese (Mandarin)** — Native
